

Echidna

The Insulated Side Entry Square to Round Grille Boot, or Echidna as it is known, offers the following advantages:

- More aerodynamically efficient than the traditional square to round adapter.
- More aerodynamically efficient than a Cushion Head
- More compact than a Cushion Head for limited ceiling spaces
- Integral Thermobreak Insulation
- Light weight
- Cost effective alternative to Cushion Head

Notes:

Echidnas come without flange, unless flange requested

When ordering, please specify A, B and spigot diameter sizes

Notes:

- Standard sizing
- Custom jobs on request
- This product uses Thermobreak, a flexible, tough vapour barrier external layer comprising a Mylar mesh reinforced aluminium foil and a layer of foam that provides both acoustic and thermal insulation. Thermobreak products are Fire Retardant (FR) and meet the BCA Building Code of Australia requirements to AS1503.3 - Early Fire Hazard as well as British Standard BS476 parts 6 and 7.
- The unit is constructed on a galvanised steel frame using a SMACNA approved Mylar reinforced tape.
- A single splitter/turning vane can be added to improve air distribution in supply air diffuser applications.
- An oval spigot option is available where spigot diameter is greater than the square size and/or installation space is limited.

Due to a policy of continuous development, prices and specifications are subject to change without notice.
